Dear <<firstName>>,

I am developing the community strategy for open science at the Neuro, and I'd love to include your perspective.

Please [book a 30 min or 60 min meeting](#) to share your opinions on how open science should move forward at The Neuro.

These invitations have been sent individually to gather a cross section of priorities. You have been invited as you have previously engaged with open science activities, and your experience of this work will be invaluable in setting priorities going forward.

I have very much enjoyed the opportunity to work with The Neuro community to develop a programme which works for you, and I look forward to supporting your success through this next phase of work.

This project has been commissioned by TOSI as an independent review of programs, strategy and community needs. [Learn more about the project here.](#)

Please do not hesitate to get in touch if you have any questions, and feel free to forward this invitation to colleague who you think should be included in this process.

Best Wishes,

Cass

Spelling and typing accuracy can be a challenge for me. Please try to infer meaning when something looks amiss, and let me know if an important detail is unclear. Thank you for your understanding.
